

1170 PORTABLE FOLDING EXAM TABLE

1170, THE FOLDING EXAMINATION TABLE ADAPTED TO YOUR ACTIVITY EXAMINATION TABLE FOR VISITING DOCTORS

The suitcase examination table 1170 is an original creation from Promotal. Light and very easy to unfold, it is used by numerous home-visit doctors as an examination table. Easily transformable into a suitcase, it takes up very little space.

ADDITIONAL EXAMINATION TABLE FOR NURSES

To optimise space and costs, the foldable examination table is excellent value for money. Ideal for nurses, either in home care or companies and public establishments (schools, military bases...)
Pharmacy and orthopaedics note: the executive order of 30 December 1985 fixes the installation and equipment conditions, and the necessary skills for suppliers of small orthopaedic equipment in order to be approved by the health insurance organisations and the Ministry for Veterans and War Victims. To benefit from this approval, it specifies that the supplier's premises must be equipped with an examination table. The Promotal 1170 folding examination is, therefore, particularly suitable for this use.
